

Working slowly and constantly on MLMs build you success.

First things first. Thank you for downloading this eBook. Generally my eBooks have an online version you can subscribe to at <http://bit.ly/d7PJ19>.

I hope that everything posted here helps you achieve what you set out to do in the first place, what ever it may be.

I have had many opportunities to join MLM and affiliate programmes and they all had one thing in common, work!

Yes that's right, work! You have to work to achieve success in any of these fields. It totally depends on your ability to get down and do the work. No one will know about you and your business unless you tell people about it! That is unless you open a shop in a very busy shopping center and let that be your advertisement. And even then you have to work by setting up the shop to be informative and attractive to your visitors.

So please don't fool yourself into thinking that you don't need to work in an MLM or affiliate business. And anyone telling you that you can get rich quickly with very little work needs to set right! The only ways to get rich fast with little or no work is by winning a lottery and the chances of that happening are generally very slim.

To earn passive money means you may have to work hard in the beginning and get yourself a good following or downline who can take over the work that needs to be done and that is the secret to your success and to being paid while doing no work.

Careful selection of people who actually want to succeed, who really want to work towards the ultimate goal of having a successful team working with and for you. How do you do that careful selection? By listening and learning about people. Make note of their needs as they tell you a bit about themselves.

You need to stop and think about what type of people are around you. Are they go getters or do they prefer to stay at home and laze around waiting for things to be given to them on a platter? Obviously people need the former type - the go getters. And those people already have their plate full don't they. They never seem to have enough time on their hands to join anything else. These type of people need a 30 hour day to have a home life and a business life at the same time.

You need to think how to attract these people and how to get them to change their priorities to come and 'work' for you! Appeal to the time factor. I am sure most people would prefer to work hard for a few years and then still be young enough to travel or spend quality time with their families. Tell them - no, **SHOW** them - about how they could achieve that!

We'll go into more info about types of people in the next blog/eBook, so please subscribe to my [blogger](#) or [my twitter](#) page and I'll let you know when the next episode comes out!

This eBook may be distributed freely on condition that no changes are made at all.
